

FELASA based alternative sample panels

ComPath is excited to announce the launch of our latest Alternative Sample Panels which screen against the Quarterly & Annual list of pathogens as recommended by FELASA. Alternative samples include exhaust air dust filter cards (e.g. Tecniplast Interceptor™ & Allentown Sentinel™), cage swabs and rack swabs. Alternative sample screens are in line with the principles of the 3R's as they reduce the number of animals required for Health Monitoring screens. All alternative samples are extracted using magnetic particle technology and processed using highly sensitive and specific qPCR assays.

**** COMING SOON ****
September 2020

M-ALT-FA (Mouse FELASA Annual)

M-ALT-FQ *Plus*

Lymphocytic Choriomeningitis Virus (LCM)

Mouse adenovirus (MAD)

Ectromelia virus (ECT)

Pneumonia Virus of Mice (PVM)

Reovirus-3 (REO)

Sendai virus (SEND)

Citrobacter rodentium (CITRO)

Mycoplasma pulmonis (PULM)

Streptobacillus moniliformis (SMON)

Clostridium piliforme (TYZ)

Salmonella spp. (SALM)

Corynebacterium kutscheri (CKUT)

\$765/sample

R-ALT-FA (Rat FELASA Annual)

R-ALT-FQ *Plus*

Hantavirus (HAN)

Cilia-associated Respiratory Bacteria (CARB)

Mouse adenovirus (MAD)

Reovirus-3 (REO)

Sendai virus (SEND)

Pneumocystis carinii (PCAR)

Salmonella spp. (SALM)

Streptobacillus moniliformis (SMON)

\$690/sample

AVAILABLE NOW!
May 2020

M-ALT-FQ (Mouse FELASA Quarterly)

Murine norovirus (MNV)

Mouse parvoviruses (MPV/MVM)

Mouse coronavirus (MHV)

Murine rotavirus (ROTA)

Mouse theilovirus (TMEV)

Helicobacter spp. (HBS)

Pasteurella pneumotropica - Jawetz & Heyl (PPN)

Streptococcus pneumoniae (SPN)

Beta Haemolytic Streptococcus Group A, B, C & G (BHS)

Fur mites {Myobia, Myocoptes} (MITE)

Pinworms {Syphacia, Aspicularis} (PIN)

Giardia muris (GDIA)

Spironucleus muris (SPIRO)

Entamoeba spp. (ENT)

Trichomonads (TRICH)

Cryptosporidium (CRYP)

\$465/sample

Immunocompromised Add On (Optional)

Mouse Kidney Parvovirus (MKPV)

Pneumocystis murina (PMUR)

Corynebacterium bovis (CBOV)

Lactate-Dehydrogenase Elevating Virus (LDEV)

\$25 each

R-ALT-FQ (Rat FELASA Quarterly)

Rat parvovirus (KRV/RMV/RPV/H-1)

Pneumonia Virus of Mice (PVM)

Rat coronavirus (RCV)

Rat Theilovirus (RTV)

Clostridium piliforme (TYZ)

Helicobacter spp. (HBS)

Mycoplasma pulmonis (PULM)

Pasteurella pneumotropica (Jawetz & Heyl (PPN)

Beta Haemolytic Streptococcus Group A, B, C & G (BHS)

Streptococcus pneumoniae (SPN)

Fur mites {Myobia, Myocoptes} (MITE)

Pinworms {Syphacia, Aspicularis} (PIN)

Giardia muris (GDIA)

Spironucleus muris (SPIRO)

Entamoeba spp. (ENT)

Trichomonads (TRICH)

Cryptosporidium (CRYP)

\$490/sample
