JULY 2015

> NEW COMPATH SITE GOES LIVE!

We are excited to announce that we have a new website! compath.com.au has a fresh new look and user-friendly navigation, making it even easier than before to access CORA (our online submission and reporting database) and keep up to date on the latest news from the lab.

We are updating our educational resources to ensure that the information you and your staff need is readily available as we continue in our commitment to being Your Partner in Research Facility Health Monitoring.

We are excited to hear your feedback on the new website and welcome suggestions on what you would like to feature, so take a look today.

> PRICELIST UPDATE

The latest version of the **ComPath pricelist** has been released and will come into effect on 1 September 2015. Whilst some services have required us to implement small price increases, we have worked hard to streamline our processes and embrace new technology which has enabled us to **decrease prices** in other areas. For example, our most popular PCR package, "PCR-Prevalent" (HBS & PIN) has had a price reduction of over 18%! Importantly, our combined-method live animal packages have not changed so they continue to provide the most cost-effective way of screening your animals.

We understand that every facility is under constant financial pressure which is why we are always striving for new ways to make your health monitoring budget stretch that little bit further. If you have any questions or comments on the new pricelist please do not hesitate to contact us for a chat.

> ANZLAA CONFERENCE

ANZLAA 2015 is fast approaching and this year it is on our home soil! We really hope to see as many of you as possible from 9-11 September at the newly renovated Adelaide Convention Centre. The annual ANZLAA conference is the best way to connect with others in our industry and we really enjoy the opportunity to discuss all things health monitoring with you face-to-face. Be sure to visit the ComPath Team at our trade display booth!

Until next time.....

The ComPath Team
